

PLA – Poly-lactic acid Bowl/lid

2021.04.29 00710/e 10 Rev. 2 / MM

Material description

PLA is generated through the production of lactic acid from glucose from fermentation. In the second step a polymerization is added to the resulting lactic acid. The glucose is obtained by the grinding and subsequent saccharification from plants which contain starch.

PLA can be processed in similar plants as PE: injection moulding, deep-draw, sheet blowing. PLA consists of 100 percent renewable raw materials, has a high stiffness factor, is moisture and grease resistant and has a high gloss. The material is transparent, printable, bio-degradable, food-save, but not heat resistant.

Product description

| Art.No | Description |
|--------|------------------------------------------------------------------------|
| N579 | Salad bowl with lid |
| N580 | |
| N581 | |
| N582 | |
| N584 | |
| N583 | Salad bowl with lid |
| N585 | |
| 14359 | |
| 14360 | |
| 14361 | |
| 12559 | Salad bowl round |
| 13650 | |
| 14517 | |
| 10063 | Lid dome with hole for drinking cups 2 dl / 2.5 dl |
| 10379 | Flat lid with hole for drinking cups 2 dl / 2.5 dl |
| 10920 | Lid for cup dessert 10838, 11434 / 10839, 11435 |
| 10921 | |
| 11151 | Lid dome stackable for salad shaker / drinking cups 3 – 5 dl |
| 11318 | Shallow Insert |
| 11645 | Lid dome stackable with hole for salad shaker / drinking cups 3 – 5 dl |
| 12012 | Lid flat |
| 12049 | Lid flat |
| 12560 | Lid for salad bowl round |
| 13309 | Lid for salad bowls 12895, 12896, 12897 |
| 13343 | Dom Lid |
| 14170 | Lid square |
| 15065 | Pie tray |
| 15260 | Lid rectang. |
| 15543 | Dom lid round for 15549, 15550 |
| 15545 | Lid rectangular for 15551, 15552 |
| 16821 | Lid rectangular for 14968 & 14969 |
| 16823 | Lid square for 14966 & 14967 |
| 17491 | Dom lid round for 15548 |
| 17522 | Container with Lid |
| 17523 | |

These information's is based on our current knowledge and understanding. Specifications may be adjusted at any time, without prior notice.

| 17524 | |
|-------|-------------------------------------------------------------------------|
| 17525 | |
| 17526 | |
| 17590 | Flat Lid round PLA 150mm for 17011 & 17012 |
| 17592 | Flat Lid round PLA 185mm for 17013 & 17014 |
| 19248 | Lid PLA, stackable, clear Ø75mm, for ArtNo 17902 |
| 19249 | Lid PLA, stackable, clear Ø85mm, for ArtNo. 17903 |
| 19250 | Lid PLA, stackable, clear Ø96mm, for ArtNo. 17904 |
| 19251 | Lid PLA, stackable, clear Ø105mm, for ArtNo. 17905 |
| 20817 | Cup insert clear, PLA naturesse, for 19476, 19477 |
| 20854 | Round lid flat |
| 21085 | Flat lid rectangular PLA transp. for 21023 - 21026 antifog |
| 21127 | Lid |
| 22138 | Flat lid for 22134 & 22136 |
| N347 | Insert for salad shaker / drinking cups 3 – 5 dl and dessert cups 10051 |
| 22145 | Flat lid |

Material / composition

Poly-lactic acid

Partly with antifog

Storage

Storage temperature: 0C to 35C

Relative humidity: dry

Storage conditions: keep away from direct sunlight

Purpose of use

Types of food to be in contact with the material:

all types of food

Applications:

Temperature resistant up to 40°C

Deep freezing -18C

Short-term contact

Single-use

NOT suitable applications:

Oven and microwave

Greenway-Denmark ApS Tolnevej 133, Tolne DK-9870 Sindal +45 98 46 15 55

Declaration of compliance

These articles meet the following regulations and are suitable for direct contact with food:

| EU-Regulation 2023/2006/EC | On good manufacturing practice for materials and articles intended to come into contact with food. |
|----------------------------|----------------------------------------------------------------------------------------------------------------------|
| EU-Regulation 1935/2004/EC | On materials and articles intended to come in to contact with food. |
| EU-Regulation 10/2011/EC | On plastic materials and articles intended to come into contact with food. And subsequent amendments until 2019/1338 |
| Directive 94/62/EC | On packaging and packaging waste. |
| SR 817.023.21 | The Swiss ordinance on materials and articles in contact with food. |

The global migration values are below the limit of 10 mg/dm² and 60 mg/kg.

Compliance with the regulations cited above is based, on the one hand, on the information provided by our suppliers, who do not disclose all ingredients to us due to secrecy, and on the other hand on our own migration tests, which we commissioned in order to validate the plausibility. Based on both the subcontractor's documents and own results, compliance with the specific migration can be confirmed.

Specific migration: A screening was performed. The limits are observed.

Dual-use additives may be included in the material: Lactic Acid, CAS 50-21-5, E270

Production site: Taiwan

Bio-degradability: The products are bio-degradable

Certificates:

Tested according to DIN EN 13432

Certificate No. 7P0305, 7P0306

Customs duty number:

3923.1000

3923.9000
